Protocol #3
District 50 Lions Dual Modality
Visual Screening Data Summary
Instructions

1. For Photoscreener/Autorefractor Chart:

• **For “Total Screened” Column:**

- Count total students screened in each grade level. Record total in the “Total Screened” column next to the appropriate grade level.
- Next, add the total amount for all grades recorded. Record the total for all grades in the green box at the bottom of the “Total Screened” column.

• **For “Referred” Column:**

- **Separate** forms with “refer sticker” on the PhotoScreener /Autorefractor side (left side of form), by grade level.
- Record the total number “Referred” in the “Referred” and “Total Referred” column.
- **Do not count the numbers in the “Referred” column again, even if it has a refer mark on the Visual Acuity side.**

• **For “UTT” Column:**

- Then record any **UTT**, by grade level, (**UTT does not count as Referred from the Photoscreener/Autorefractor Chart**).
- **UTT for Pre-K in Photoscreener is a referral. They do not do Visual Acuity.**

• **For “% Referred” Column:**

- To calculate the percentage for each grade level in the “Total Referred” box, divide the “Total Referred” number by the “Total Screened”. (round to the nearest whole number)
- Record the percentage in the appropriate “Total” green section at the bottom of the form.

2. For “Visual Acuity” (VA) Chart:

• **For the “Referred” Column:**

- Count the number of VA Chart “Referred” (either one or both eyes marked with “X”) for each grade level and record the total in the appropriate grade level box under the “Referred” column.
- Then count the number of **“UTT”** in each grade level. Record that number in the appropriate grade level box under the **“UTT”** column.
- Next **add** the “Referred” and **“UTT”** for each grade level. Record the total in the “Total Referred” column.
- Lastly, calculate the percent the same way as mentioned in the Photoscreener/Autorefractor Chart section.

3. For “Total Refer” Chart:

• **For the “Total Referred” Column:**

- **Add the “Total Referred” in the Photoscreener/Autorefractor and Visual Acuity Chart.** Record the total in the “Total Referred” Column in the “Total Refer” Chart. Complete this for each grade level.
- Then calculate the percentage as previously done. Record in “% Referred” green box.
